

## **DESCRIPTION**

---

Cable splicing kits are suitable for either 2 or 3 way cable splicing.

Kits include upper and lower moulds, crimp links, resin, hardener and a lid for the mould.

The splice kit has proven to be very strong in many environmental conditions. They are moisture resistant for above or below ground applications.

## **APPLICATION(S)**

---

Splice kits are commonly used in the telecommunication industry, as well as the Cathodic protection industry.

## **TECHNICAL INFORMATION**

---

Splice kits come in 2 different sizes, and are suitable for splicing cables up to 37mm OD.
